noor ai concierge

COMPANY PROFILE
2026

AI that takes the office work off your team.

Noor Ai Concierge FZE is a licensed UAE technology company based in Abu Dhabi. We build AI assistants and office automation for companies of every size, from a single branch to groups with hundreds of staff. We first study how a department really works, then automate the repeated work around the tools, approvals and people you already have.

WHAT WE AUTOMATE, DEPARTMENT BY DEPARTMENT

PROCUREMENT

From request to purchase order

Site and staff requests turned into RFQs, supplier quotes compared side by side, price history of repeat items, and draft purchase orders ready for approval.

FINANCE AND ACCOUNTS

Invoices, matching and collections

Supplier invoices read and entered, checked against the PO and delivery note, polite payment reminders, customer statements, and data made ready for UAE e-invoicing.

SALES AND CUSTOMER SERVICE

Every enquiry answered on time

Replies on WhatsApp, email and website chat from your real information, quotes from your price list, follow-ups on open quotes, and bookings.

OPERATIONS AND PROJECTS

Field updates into clear reports

Photos, voice notes and messages from sites turned into daily job reports, maintenance requests into work orders, and monthly client reports.

HR AND ADMINISTRATION

Documents, visas and payroll prep

Every licence, visa, permit and insurance expiry tracked with reminders, timesheets summarised for payroll, and onboarding paperwork prepared.

MANAGEMENT

One clear view every week

Short weekly reports for owners and managers: sales, cash received, open quotes, overdue payments and the work waiting for a decision.

We prepare, your people approve

Anything involving money, a legal filing or a promise to a customer goes to a person first.

Built around your way of working

No new software for your team to learn. Day one looks the same, with less typing.

English, Arabic, Urdu and Hindi

Assistants reply in the language the customer or staff member writes in.

HOW WE WORK

1
Discovery
A short session with the department head to map one process, its documents and its approvals. No cost.

2
Pilot
One job in one department, with a fixed scope and a fixed price, built on your real documents.

3
Rollout
Once the pilot proves itself, we extend it to more users, branches or departments.

4
Support
A named contact, fixes and improvements, and a monthly review of what the system did.

WORKS WITH YOUR EXISTING TOOLS

- Email, WhatsApp Business and website chat.
- Excel, Google Sheets and SharePoint files.
- Accounting and ERP systems. Where a system allows a direct link, we use it. Where it does not, we work from its exports and imports.

Outlook · Gmail · WhatsApp Business · Excel · SharePoint · SAP · Oracle · Microsoft Dynamics · Odoo · Zoho Books · QuickBooks · Tally

SECURITY AND DATA

- Your data stays in your own accounts wherever possible.
- Access is limited to what each job needs, and every action is logged.
- Customer-facing assistants say they are automated and follow the UAE data protection law (PDPL).
- We sign a non-disclosure agreement before seeing confidential documents.
- We never pay, file or sign on your behalf.
